

# *Salvia guarantica*

## Blue Sage

Blue Sage is a woody perennial. This *Salvia* changes the practice of using only red and orange in the butterfly and hummingbird garden. Flowers are abundant from summer into fall. Deadheading will encourage repeat flowering. Plant Blue Sage in full sun in soil with good drainage. Drought tolerant, but lack of water may reduce the number of flowers.

Height: 2' – 3'

Spread: 2' – 3'

**Though non-native, there has been no sign of invasiveness on the Tifton Campus.**
