

# *Clematis virginiana*

## Virgin's Bower

Showy white flowers summer and fall make this native vine very desirable. It will grow in full sun or partial shade, loamy or sandy soil. It will grow in average or moist soil, and can be used as a wetland plant. *Clematis virginiana* is a deciduous vine. Virgin's bower will require support as it does get top heavy.

**Height: 12' – 20'**
