

Cyrilla arida

Sandhill Titi

Cyrilla arida is a rare, evergreen small tree or large shrub with interesting bark. Each plant may have a unique free-form habit of growth. The delicate, white flowers are quite a show in summer when most trees have stopped flowering. An added bonus to *C. arida* is fragrance of the flowers. This *Cyrilla* requires a well-drained site in full sun to partial shade. The plant will tolerate some drought and salt.

Height: 10' – 25'

Spread: 10' – 15'
