

Heuchera americana

Rock Geranium, Alum Root

Varied shades of green, scalloped edges, interesting vein formation, and evergreen! Rock geranium is a beautiful and unusual foliage plant; it also has spikes of tiny flowers in the fall. Tolerant of drought, it will also grow in moist soil. Plant *Heuchera* in partial shade. In the lower regions of the south, be sure to avoid the hot afternoon sun.

Height: 1' – 3'. Spread: variable
