

Phlox sp.

Phlox

The showy clusters of pinkish purple flowers top these perennials in the summer. The *Phlox* available at SGNP&WS are similar to those seen growing in ditches by roadsides and are quite noticeable, even at interstate speeds. Best growth is in full sun or light shade, in moist well-drained soil. Butterflies and hummingbirds are attracted to Phlox.

Height: 1' – 2'

Spread 1' – 2'
