

Rosa laevigata
Cherokee Rose

Evergreen with fragrant white flowers, this rose is not a native of the Americas; it has naturalized so well that people often forget that fact. Cherokee Rose became the Georgia State Flower in 1916. It makes an excellent specimen plant or hedge, if you plant with the thorns in mind. Fast growing, grows in dry or moist soil, thrives in sun.

Height: 8' – 10'. Spread: 8' – 10'
