

*Salvia microphylla*  
Cherry Sage, Baby Sage

**Frost tolerant, multi-stemmed shrub with evergreen foliage. An abundance of red flowers from spring to fall. It does well in most soil types, from occasionally wet to dry. Grows in full sun to light shade. Not a native to the Southeast US but it is not invasive. Hummingbirds love it!**

**Height: 3' – 4'      Spread: 3' – 4'**
