

# *Solidago lanceolata*

## Lance-leaf Goldenrod

**A well known, under appreciated perennial, attractive to birds and bees! The common goldenrod brightens roadsides and old fields across the state in the fall. This species is graceful and fine textured, with narrow leaves. *S. lanceolata* performs best in full sun, in a wide range of soils. Combine goldenrod with beautyberry, ornamental grasses, asters &/or sunflowers for a colorful late season show!**

**Height: 1' – 4'      Spread: 1' – 3'**
