

# *Vitex agnus-castus*

## Chaste Tree

**Chaste Tree is not native to America, but if you want butterflies this is a good choice. Drought tolerance is another good feature. This plant looks best left natural. The flowers have a subtle color, but are showy, fragrant, and are produced from summer into fall. Flowers are produced on new growth. Flowering is best in full sun.**

**Height: 8' – 12'. Spread: 8' – 12'**
